## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species: the method wherein the stable isotope labeled group  $R_2$  is  $CD_3$  and carboxylic acid is reacted with a chloroformate and a labeled methanol, or with a base and a labeled methyl iodide (claim 6); the method wherein the stable isotope labeled group  $R_2$  is  $CD_2CD_3$  and carboxylic acid is reacted with a chloroformate and a labeled ethanol, or with a base and a labeled ethyl iodide (claim 7); the method wherein the stable isotope labeled group  $R_2$  is  $CD_2C_6D_5$  and carboxylic acid is reacted with a base and a labeled benzyl iodide (claim 8). The species are independent or distinct because they represent reaction of carboxylic acid with different reagents yielding different products.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 5 is generic.

2. This application contains claims directed to the following patentably distinct species: alcohol is selected from a group consisting of methanol and ethanol (claim 10) and chloroformate is selected from a group consisting of isobutyl chloroformate, methyl chloroformate, and ethyl chloroformate (claim 11) (claims 10 and 11 are one group of species); alkyl halide is selected from a group consisting of methyl iodide, ethyl iodide, and benzyl chloride (claim 12), and the base is selected from a group consisting of sodium hydroxide, sodium carbonate, pyridine and triethylamine (claim 13) (claims 12 and 13 are another group of species).

Applicant is required under 35 U.S.C. 121 to elect a single indicated group of species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1743

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. A telephone call was made to Hoa Duc Nguyen on 03/28/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Examiner's Note: the Applicants are advised to amend claims 14-16 to eliminate the issue of a lack of antecedent basis for the limitations "said multiple carboxylic acid esters" or "said multiple carboxylic acid esters internal standards", since these limitations are not recited in the parent claim 1.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yelena G. Gakh, Ph.D. whose telephone number is (571) 272-1257. The examiner can normally be reached on 9:30 am - 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on (571) 272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
